Best Practices

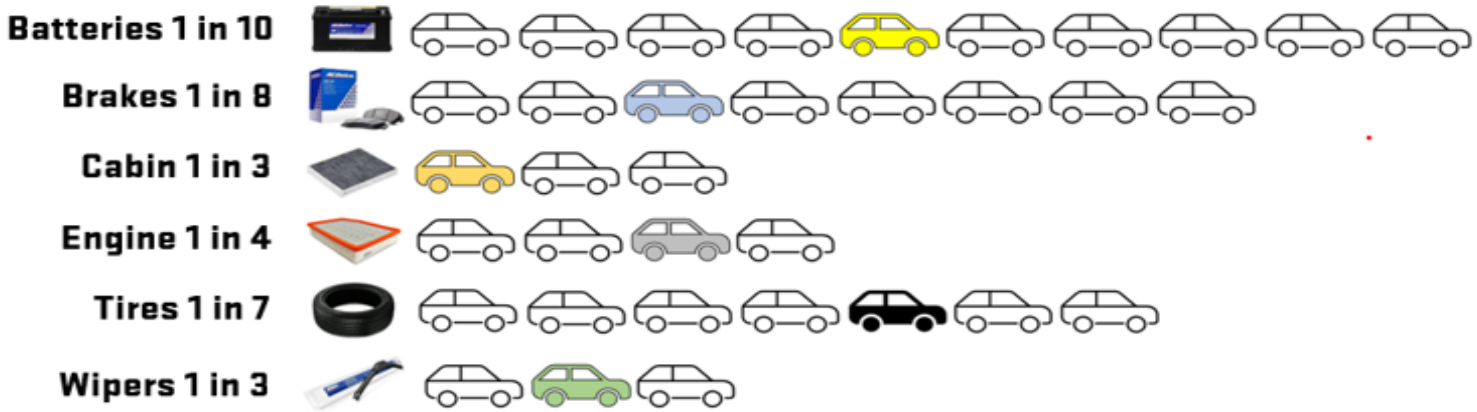
Print and post this PDF where all staff can see to drive engagement

Recognize and champion Store Leaders, Advisors that have met their F6 Objectives, District Leaders or those who are placing in the top five of F6 sales in the district.

Educate Advisors regarding any lost revenue if sales are below the Objectives and what that means to the store, and to them.

F6LB Feedback

This is the Focus 6 Leaderboard which tracks and displays the Unit sales of each Focus 6 product. The Leaderboard indicates how each service advisor who reports the sale of a F6 part number, on any customer pay repair order places within the store, with other service advisors, and against the NADA statistic.



As each service advisor interacts with the same number of customers per day on average, this comparison is provided across a level-playing-field so that each advisors performance can be measured accurately.

Within each F6 section, the advisor can see where they are currently within their store (BRAG), against their objective (BEAT) and how the place in the district (COMPETE) along with how many units they need to meet their objective and/or lead advisors in the district.

The Bar Graph within each F6 section also provides a visual representation of how they are performing versus the objective, and in leading your store and the district. If you are a Service Manager, this is an opportunity to coach and counsel as well as reward the service advisors in your store.

Thanks to taking the time to review this information and to maximize your opportunities to care for OUR customers
